EXPERIENCE THE BETTER WAY TO BUILD TOGETHER

Autodesk Construction Cloud connects workflows, teams, and data at every stage of construction to reduce risk, maximize efficiency, and increase profits

C BIM Collaborate Pro

Empower BIM experts to improve constructability of models, increase transparency in managing risk, and facilitate more efficient design collaboration

- Design Collaboration
- Automated Clash Detection
- Aggregated Model Coordination

T Takeoff

Enable estimators to perform more accurate 2D takeoffs and generate automated quantities from 3D models

- 2D Takeoff
- 3D Takeoff
- Scope Analysis

B Build

Empower builders with a field execution and project management solution to seamlessly collaborate and deliver construction projects on time, on budget

- Project Management
- Quality Management
- Safety Management
- Cost Management
- Project Closeout
- PlanGrid Build Mobile App

D Docs

Organize, distribute, and share files on a single, connected document management platform, ensuring all team members have access to the information they need.

- Document Control
- Document Versioning
- Document Approvals

INSIGHT

Get up to speed with what's going on in a project, assess trends and patterns in project data, identify any gaps and problems, and use predictive risk data to improve project efficiency.

- Dashboards
- Reporting
- Construction IQ
- Data Connector

ADMIN

Centralized configuration and management of projects, companies and users to support standardized processes.

- Templates
- Team Management
- Notifications
- APIs

AUTODESK Build

Autodesk Build empowers project teams to collaborate more effectively, for increased ROI

✓ Document Management
Store and manage all project documents and data from design through construction in a Common Data Environment

✓ Access up to date information, anywhere
View project information wherever you are. From plans and specifications to snag lists, documents and photos , Autodesk Build is your single source of truth

✓ Publish Drawings in Minutes
Instantly upload and distribute drawings and documents that are automatically hyperlinked, versioned in order, and easily searchable with full drawing search.

✓ Assign tasks to specific drawings
Create and map tasks to exact location on drawings, tagging the assigned team member and specifying a deadline.

AUTODESK Takeoff

Improve forecast accuracy and reduce rework with integrated 2D + 3D quantification

Keep Team Connected in Real Time
Align estimators with construction teams with cloud-based data management that ensures everyone is working from a single source of truth. Eliminate oversight by giving the entire team access to the most up-to-date information.

Save Time With Automation
Align estimators with construction teams with cloud-based data management that ensures everyone is working from a single source of truth. Eliminate oversight by giving the entire team access to the most up-to-date information.

Reduce Risks with Insights
Avoid rework by visualizing project scope in 3D, allowing estimators to better understand design intent and constructability issues. Leverage a single inventory of 2D and 3D quantities throughout the construction process.
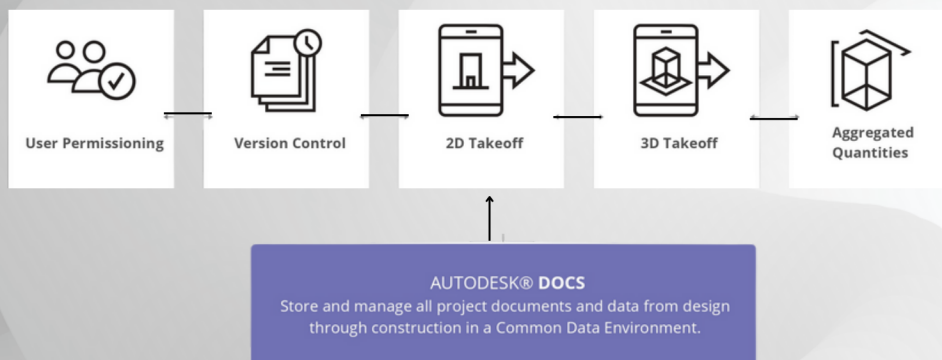

Centralize document management
Organize, distribute, and share files on a cloud-based, single document management platform, ensuring all team members have access to the same information and latest document set

Avoid repetative processes
Perform linear count or area takeoff with multiple quantities output and use custome formulas to generate complex quantities. Easily move existing takeoff to newer versions of drawings.

Connect your data
Aggregated 2D+3D quantities can be rolled up by classifacation, type, and material. Easily export quantities to Excel and connect to your estimating solutions.

| User Permissioning | Version Control | 2D Takeoff | 3D Takeoff | Aggregated Quantities |

AUTODESK® DOCS
Store and manage all project documents and data from design through construction in a Common Data Environment.

Simplify user management
Safeguard your projects with robust user-based permissions. Ensure the right people have access to the right data and tools

Takeoff with speed and accuracy
Get access to quantities from the model for tremendous time savings and improved project scope visualization.

Improve Collaboration
Autodesk Takeoff breaks down data silos, allowing multiple estimators to collaborate on the same project.
